Hi John and Liz,

See below for a bit of text describing works on the A428 bund. Again hopefully this will help to keep queries at bay.

Upper Cambourne A428 Bund Path works and Landscaping Update.

Spoil deposition on the northern boundary of Upper Cambourne is now complete and works can continue to construct the remaining sections of bridleways and footpaths in the area.

Path construction and planting was carried out last year on the eastern section where progress with spoil deposition allowed it. These works can now continue west and are scheduled for completion in spring 2018.

Once the works are practically complete and the site is deemed safe, the paths will be opened to the public. Work will continue to ensure that the planting and seeding develops successfully once the paths are open.

Completion will mark another 20,000 trees having been added to the network of green space around Cambourne and will be the final piece in the jigsaw to complete the circular route around the boundary of the Cambourne development.

Dear John

I am contacting you as a representative of Cambourne Exiles Rugby Club.
I organise our yearly social functions and assist with catering for our league home matches.
I am aware the issue of the inadequate cooker has been raised before. But due to issues we are having with the hob in place at present we are enquiring to have it removed and a fully functional cooker with oven to be put in its place. The hob at present really is not appropriate for our needs as a club.

Are we completely liable for costs:

- Electrician/ fuse board extension/ cooker/fitting
- Are costs negotiable to be split with sports in Cambourne or the council?
- Due to the old chiller room not working is it possible to use the fuse board section for the new cooker to reduce costs?
- if we cover all costs will use be restricted by other users of the premises?

Kind regards

Joanna Wallis
