

Candidate Statement

I took up employment in Cambourne Business Park in July 2017 and relocated to Cambourne in August 2017. I instantly fell in love with not just the fresh and pleasant environment in the town also the way community has organised itself. Different groups are well-knit and open, taking an inclusive approach towards other groups.

I felt compelled to devote myself more and get involved into the community I live and work in. I have developed many strong friendships through work and social events in the town. Myself and my family have volunteered at different events. I am a trustee of one of active local charities where I volunteer regularly, participating in a variety of activities. These range from collecting donations for local food bank and delivering food for the homeless to organising family get-togethers inviting members of local community across different faith groups and political affiliation.

Educating and equipping our youth with skills is most important to me. I have attended meetings, presented ideas and volunteered in this regard. As an example, I have devoted time for the fairs at my daughters' school. I am one of the mentors at our local Tech Club (run by Cambourne Crescent).

I want to play a more effective role in the service of our local community as a Town Councillor by supporting the decisions in its best interest.

Hassaan Touheed
